

INVITATION TO ATTEND:

1st international teachers' conference on Inspiring Climate Education, ICE09, Copenhagen, Denmark, October 12-14, 2009

In cooperation with the Danish Ministry of Education, Danish Science Communication will present an inspiring program on this first conference of its kind. Presentations on climate change, teaching methods, and the role of informal learning settings alternating with workshops that will develop recommendations to future practice in the field of teaching climate change will constitute the content of the three inspiring days in Copenhagen.

Climate change is high on the political agenda all over the world. United Nations Climate Change Conference (COP15) will take place in Copenhagen in December of 2009, and never before has it been more relevant for teachers, decision-makers and researchers to get together and exchange ideas on how to develop innovative teaching practices in this field.

ICE09 will give you:

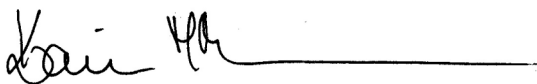

- Information on the scientific aspect on the current climate change
- A channel for disseminating teaching materials
- Exchange, inspire and develop Best Practice
- International cooperation and network

Please take a moment to look at the conference website: [www.ICE2009.org](http://www.ICE2009.org) and download the first announcement.
